

GREAT DIVIDE HAS SPLENDID NET EARNING

Increase in Production Notice-
able From Quarter to Quar-
ter From Report

A big increase in production, value of the ore mined, and in the gross and net yields is shown in the report of the Tonopah Mining company for July, August and September, as compared with the figures for the second quarter of April, May and June. The company's reports and payments are made to W. J. Box, assessor of Esmeralda county, in which the mine is situated.

The report for the third quarter is as follows:

Tons mined	4866
Value per ton	\$32.05
Gross yield	\$155,944.10
Net proceeds	\$82,549.81
Expenses	\$73,394.29
Profit	\$9,155.52
Dividend	\$2,477.93
Reserve	\$6,677.59
Balance	\$29,778.15

Total production, \$73,394.29. The amount of tax paid, at the rate of 2.5%, was \$2172.71.

This is an increase from quarter to quarter of \$5.34 in per ton value, 14 tons of ore mined, \$28,657.65 in gross yield, and \$25,385.11 in the net proceeds. Despite these increases there was a \$371.50 reduction in mining cost and an increase in the cost of development of only \$307.61. The increase in the bullion tax paid the county was \$668.13.

NORTH STAR IS SHOWING HIGH GRADE MINERAL

Ore Shipments Gradually Being
Augmented as Development
is Carried Forward

The Tonopah North Star mine is making a splendid ore showing, according to reports and the outlook is most promising for the production being greatly augmented within the near future. The showing on the 350' level is reported as gradually improving, and the orebody is considered of more than ordinary importance. It is stated that the orebody has a width of between three and four feet and that values averaging \$25 a ton are contained.

As a result of this find the North Star has three faces of shipping ore. Shipments have been going out from the 1050' level for some time, as well as from the 1000' level. The production during the past few months has averaged around 50 tons weekly, but with the improved conditions it is hoped to increase the output gradually from this time forward. The settlement sheets previous to a few weeks ago showed values around \$30 a ton, and the fact that the ore is richer than heretofore tends to encourage to the situation.

Some important work is being performed in the upper workings of the mine, but no official announcement concerning results has yet been forthcoming. However, it is known that new ore bodies are being encountered, which means that the tonnage being consigned to the Belmont mill will shortly be augmented.

NEW ALTO NOW MAKING GOOD ORE SHOWING

Rich Stringers of Ore Are in
Evidence in Two Raises
Carried on 400 Level

Important developments are taking place on the New Alto Divide property in the Divide district and it begins to look as though shipping ore was about to be encountered. In the raises that are being carried from the west drift on the 400 level on the main Alto vein stringers of rich ore are putting in their appearance. The vein matter is heavily mineralized and indications are favorable for a commercial body of ore being uncovered with the firing of almost any round of holes. What is known as B raise has been carried to a height of 30 feet, and C raise is now up 50 feet. Both are showing a large vein that is heavily mineralized, and the entire product could no doubt be handled at a profit providing milling facilities on

the ground were available. Joseph Mayer, the superintendent, states that he thoroughly believes that within the next week or ten days that important changes will take place and he is confident that the property is nearing the shipping stage.

HANNAPAH PROPERTY RECEIVING ATTENTION

Vickers & Green, who are operating the Hornsilver property at Hannapah, are rushing operations, and everything is now in readiness for a more active campaign of development. A hoist was recently installed at the old shaft which has a depth of something like 150 feet, and the water is now being lifted from the workings. As soon as this task has been completed it is intended to drive a crosscut for the purpose of picking up three separate and distinct veins that show strong mineralization on surface, and it is generally conceded that the ore shoots will be found to be persistent at that depth. A few weeks ago a shipment of five tons of ore was made from a shaft of shallow

Individual Wet Wash

A new washing service. The boon you have been looking for. At a price you can afford to pay. Think of it—15 pounds for 75 cents, weighed dry, and 5 cents for each additional pound!

Delicate fabrics are enclosed in net bags, while being washed, thereby reducing wear and tear to the minimum.

Each customer must furnish a canvas bag, or we will furnish one for the nominal sum of 50 cents, returnable at any time.
